Get The Most Out Of Your Alan-1 Game

Major League eSports & The Game Grid Operators Apps

Thank you for your purchase of an Alan-1 video arcade game. We are excited for your game to find a great new home, sharing the love and excitement that comes through video games that were crafted with care.

At Alan-1, we are innovating the industry by doing things a little differently than your typical arcade manufacturer. We have developed two special mobile apps that were crafted to drive players to your venue. This guide is to familiarize you with their features and benefits so that your game can reach its maximum earnings potential.

Major League eSports (MLeS) is designed for your customers, the players

Game Grid Operators App is designed for you, the operator

Here, we will detail each of the apps, starting with MLeS.

Major League eSports (MLeS)

We've made eSports free and available to everyone, making it easy and FREE for you as an operator to feature eSport tournaments in your arcade!

What can MLeS do for you?

- Free to make an account
- Works on every Alan-1 game
- Track all of your scores and share them with friends
- Receive notifications of vanquished scores
- Find MLeS connected games on location
- Track earned achievements
- Earn League Points to compete in the Worldwide MLeS championships

Asteroids Recharged advertises the MLeS app in the attract mode, which your customers can download by scanning the QR code, then downloading the app.

After credits have been inserted into the game and any player pushes start, the screen will display a QR code for each player to use. Go into the app, press the QR code button in the upper right corner of the phone screen, then scan the code on the game screen. It will log you in and begin tracking your progress.

We highly recommend that you promote this feature, as we designed it to drive repeat play to your location. You will also be able to set up your own local tournaments by using the Alan-1 Game Grid app that was used for connecting WiFi and registering the cabinet.

          You can also access the link on your phone by scanning this QR code:

Game Grid Operators App

This is a utility app that has been designed to help you as an operator in further being able to expand what you can do with your purchase. Like MLeS, it is completely free! These features are:

- Registering your machine's warranty
- Connecting the game to the internet
- Monitoring the game's performance remotely
- See which MLeS users have been playing on your cabinet
- Ping those MLeS players with events and specials
- Set up MLeS tournaments (weekly recommended)

It is recommended that you grab this app before setting up your game, that way you will be ready to set up the WiFi internet connection when requested during the first-time boot process.

To download the Game Grid Operators app for an iOS device, scan this QR code (Android QR is on the next page):
